

Musical Performance

This term we will be working on our end of year class production, called, "We're all going on a summer holiday!" We will be performing this as an end of Y6 production at 1.30pm on Wednesday 20th July.

Life skills

Children will look at current issues in the news each week. Whole school 'enjoy and achieve' weeks will include - a creative literacy fortnight and a health and fitness week. Year 6 will also take part in transition activities to prepare them for secondary school.

Art and DT

This term the topic is stories in art. Children will focus on tapestry and the story, 'Holes'. They will explore a variety of textiles and experiment with embroidery, appliqué, weaving and plaiting.

R.E

We will be looking at religions around the world and within communities; thinking about religious beliefs and the environment. Towards the end of term we will look at the use of symbols in religion.

PSHE

Children will set new goals this term and discuss changes they will face at the comprehensive school. Children will also be given the opportunity to visit their secondary schools in July.

P.E. To encourage year 6 children to be healthy, we dedicate both a P.E lesson and a SAQ lesson to fitness. Team games and small ball games such as tennis will be taught this term. Athletics will also be taught towards the end of the summer term. The children will continue to work alongside N.U.F.C.

We will also be looking at famous athletes and I will be encouraging the children to watch the French Open and Wimbledon tennis tournaments.

Annfield Plain Junior School

Summer Term

2022

Year 6

Mrs Dorward

English

In English lessons, year 6 pupils will continue to learn about the Titanic, completing a range of fiction and non-fiction writing about life aboard this fated ship.

We will then complete creative writing around a story called "Holes" by Louis Sachar.

Also, class 6 will continue to focus on punctuation and grammar throughout the term, on a daily basis.

There will also be the opportunity for children to complete a page in our Year 6 yearbook.

Children in class 6 need to continue to read at least 5 times per week to keep their reading standards high and continue progression in reading. This will greatly benefit your child's progress moving on to secondary school. Please note all children need to get 5 signatures per week to gain house points.

Maths

Maths continues to be a very important subject in the curriculum this term and the following topics will be concentrated on:

- All four number strategies,
- Shape and space,
- Data handling,
- Real life problems,
- Fractions and decimals,
- Target work in preparation for year 7.

Children will continue to improve their mental arithmetic and problem solving skills daily, to ensure their maths agility develops pace and that children are able to apply their knowledge and skills.

Computing

The children will continue to work on coding - using Kodu to programme, debug and create new computer games.

We will also be looking at using Prezi to create 'non-linear' presentations.

Science

In Science, children will investigate and draw up conclusions. They will learn about micro-organisms and the evolution of living things.

THANK YOU!

We would like to take this opportunity to thank all parents for their continued support over the last year. It has been a hectic year, but we are delighted that children have been able to remain in school all year.

As a class, the pupils have worked, without complaint, to get themselves back in to a school routine after such an unsettled period. We are now aiming to get prepared for their transition to secondary school. We wish them the best of luck!
